Practice Book

Times Tables

Practice Book

Name:

Class:

My Record Log

I know my:

2x		8x	
3x		9x	
4x		10x	
5x		11x	
6x		12x	
7x			

I can:

Divide by 2		Divide by 8	
Divide by 3		Divide by 9	
Divide by 4		Divide by 10	
Divide by 5		Divide by 11	
Divide by 6		Divide by 12	
Divide by 7			

Activities which helped me:

(1) Choose which times table you would like to practice e.g 2

Introduction

Welcome to your Times Tables Practice Book.

This is your chance to practice your time tables at home this year, so that you become really confident in them.

This isn't for your teacher to mark but definitely bring it in sometimes to show them all the fantastic progress that you've been making.

This page has been completed as an example to show you how to fill in each page.

(2) Enter the number of the times table that you are doing in any blank boxes to the left of the = sign

(3) Write your answers to the right of the = sign

(4) Challenge yourself by doing the division facts for your chosen times table.

You answers Chosen table

Useful Information for Parents

When does my child need to know their times tables?

In England, children will be expected to know the following in each year at primary school:

- **Year 1:** count in multiples of 2, 5 and 10.
- **Year 2:** be able to remember and use multiplication and division facts for the **2, 5 and 10** multiplication tables, including recognising odd and even numbers.
- **Year 3:** be able to remember and use multiplication and division facts for the **3, 4 and 8** multiplication tables, including recognising odd and even numbers.
- **Year 4:** be able to remember and use multiplication and division facts for the multiplication tables up to **12 x 12**.
- **Year 5:** revision of all multiplication and division facts for the multiplication tables up to **12 x 12**.
- **Year 6:** revision of all multiplication and division facts for the multiplication tables up to **12 x 12**.

What is the Year 4 multiplication tables check?

The new [Year 4 multiplication tables check](#) became statutory in 2020. Your child will need to take a short online test to make sure their times tables knowledge is at the expected level.

How can I help my child learn their times tables at home?

Video: How to practise times tables (from Oxford Owl)

(https://www.youtube.com/watch?v=5_RBfrNAZEY&t=2s)

Education expert and parent Isabel Thomas offers her advice on making times tables practise fun with flashcards, post-its, and competitions.

Andrew Jeffrey shares his favourite times tables tricks and games to help your child become more confident with their times tables.

Times Tables Top Tips (from Oxford Owl)

Oxford Owl provides some useful advice and great ideas to help you support your child in learning their times tables.

Practise tables as a time-filler

When you're sitting at traffic lights or waiting in the doctor's surgery it is the perfect opportunity for a bit of times table practice! It's always better (for both your child and you!) to just spend a few minutes reciting or testing times tables rather than going into overdrive and spending too long practising them.

Help them with the ones they find tricky

There are usually one or two multiplication facts in each times table that are more difficult. When you notice that your child is stumbling over the same fact each time, try to give them extra practice. You could even get your child to write the fact out in a fun way on a piece of card and then stick it somewhere prominent (like on the fridge) so that they have an extra reminder!

Use a number grid

Printing off a simple 10 x 10 number grid can be a great way to demonstrate how times tables relate to number sequences. You can get your child to colour in multiples of different numbers on different number squares so that they can clearly see the number patterns.

(Link https://cdn.oxfordowl.co.uk/2017/02/10/12/29/57/51/number_square_3_times_table.png)

Make it real

The danger with too much rote learning of times tables is that children can fail to see the use of times tables in real life. Try to take opportunities to get your child to use multiplication in problem solving, for example working out quantities for scaling up a recipe, or calculating the price of more than one item of shopping.

Create a challenge

Make it fun by turning times table practice into a competition or challenge for your child, by timing them and keeping a record of their scores. You could even join in yourself and set a challenge to learn a more difficult times table, such as the 13 times table and get your child to test you at the end of the week in exchange for testing them.

Real life opportunities

Family life can give loads of opportunities to make multiplication real. Look for opportunities to talk about multiplication – at mealtimes for example.

All 4 of us are going to have 2 pieces of toast for breakfast. How many pieces will we need altogether?

We want to give 3 children 3 raspberries each. How many raspberries will we need altogether?

Use real objects

Using real objects – like pennies or marbles – see if your child can find how many they would need to give 2, 3, 4 or 5 friends 2, 3, 4 or 5 pennies each. Try to find a multiplication that won't be too hard, and make sure your child has enough pennies!

Play shops

Create a shop at home with your child. Price up some things to sell and role play buying and selling more than one of some items. The prices can be quite simple (5p), or quite hard (42p, £1.49) depending on what kind of multiplication your child is ready to try. Have some paper and pens handy for trying out methods to work out the answers.

Arrays

An egg box is an example of an array. An array is a set of objects arranged into rows and columns. Each row has the same number of objects as the other rows; each column has the same as the other columns.

The arrays that we find in our daily lives help children to see and understand multiplication. Hunt around your home with your child to see how many arrays you can find (e.g. an egg box, a paint box, a muffin tray, an ice cube tray). Talk together about the multiplications they show e.g. 3 rows of 5 = 3×5 .

Any order

An array, such as an egg box or an ice cube tray, can help bring home to children an important multiplication fact: multiplication can be done in any order – the answer will still be the same. 2×3 will always give the same answer as 3×2 . With arrays, children can see this visually.

Play games on Oxford Owl

Try the fun online games to help your child practise their multiplication skills.

Cook together

Cooking is a fun way for children to explore lots of mathematical concepts, including multiplication. Follow some recipes, but try multiplying the quantities by 2, 3, 4 or more. Our delicious banana milkshake recipe is the perfect opportunity to practise multiplying 2- and 3-digit numbers. Plus, you get a tasty bonus at the end!

Dominoes

For older children, dominoes can be a great way to practise multiplication. Make all the dominoes face down. Each player should then turn one domino over and try to multiply the two numbers on their domino together. One point for each correct answer. Challenge your child to see if they can beat you! If you don't have dominoes, you can try this with a pack of cards. Take out all of the picture cards first and then challenge players to take two cards and multiply them together.

Play multiplication bingo

Practise multiplication and times tables at the same time with our 7 x table multiplication bingo. Follow the easy instructions and bingo cards. Why not try to make your own cards if you want to practise a different times table.
